

HOT TUB HIRE CHEMICAL GUIDE

Fill the hot tub up so the waterline is always well above the jets – you must remember to top the water level up as and when you use it throughout the hire

Pre dissolve 3 heaped tablespoons of chlorine (Boost) granules and add to the water. Straight after pre dissolve and add 1 heaped tablespoon of shock (Refresh) – **LEAVE FOR 12 HOURS to heat up**

The following day – test the water with the tester strips and if required add 1 – 2 heaped tablespoons of Boost Chlorine Granules. REMEMBER to pre dissolve any chemicals before you add them. Turn the pump on when adding any chemicals so the water is circulating (the pumps will turn off after 20 minutes by themselves)

Check the hot tub regularly (daily) with the tester strips to see whether there is enough chlorine in the water. You need to wait 12 hours after adding the Boost to get an accurate reading. The best time to add the chlorine is just after anyone has used it or, last thing at night – this way you can check it in the morning

DO NOT USE THE HOT TUB FOR 20 minutes after adding any chemicals

The water may go cloudy if the chlorine level goes too low. If this happens please take the filter out and rinse through, add some more chlorine as soon as possible and 2 heaped tablespoons of Refresh. If the cloudiness is still there the next time you check the levels (the following day) add JUST THE REFRESH AGAIN – again 2 tablespoons

You may get cloudy water even if the chlorine level is spot on if this happens add the Refresh for 2 days running

Try and get anyone that is using the hot tub to rinse their swimming costumes through before they get in it. Detergent from swimming costumes will cause the water to foam, if this happens just add a couple of capfuls of Anti Foam.

Take the filter out after a few days and rinse in cold water – this needs to be done every few days or after lots of people have used it (more than normal)

PLEASE REMOVE THE HOT TUB COVER CAREFULLY AND PLACE ON THE STAND PROVIDED – ANY DAMAGE TO THE COVER WILL BE CHARGE FOR

Enjoy and have a good time.
